## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43 and 44, drawn to an immunogen composition and method for storing the composition, classified in class 424, subclass 70.11.
- II. Claims 45-71, drawn to a delivery vehicle and a method for storing the delivery vehicle, classified in class 424, subclass 457.
- III. Claims 72-126, drawn to a method for delivering a drug into a host, classified in class 435, subclass 3.
- IV. Claims 127-169, drawn to a method for inducing an immune response in a host, classified in class 424, subclass 9.1.
- V. Claims 170-197, drawn to a method for mucosal delivering a drug, classified in class 424, subclass 434.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of group I and II are directed to the different products, e.g. the product of the group I is directed to an immunogenic composition, whereas the product of the group II is drawn to the delivery vehicle.

Inventions III-IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of groups III-V are drawn to different methods, e.g. the method of Group II is directed to the method for delivering a drug into a host, whereas the method of group IV is directed to a method for inducing an immune response.

Because these inventions are distinct for the reasons given above, the restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
